

As a citizen I am deeply concerned over the upcoming program that will air on the Sinclair television stations. The information that will be presented is questionable as to whether it is legitimate news or merely a political ploy by a group with interests in the outcome of the coming elections. I encourage the FCC to work with this station and have them balance this type of biased information with biased information from the opposing side...perhaps Michael Moore's "Fahrenheit 9/11." No one would expect Sinclair to run the Michael Moore film...please stop the ravings of a politically minded group from receiving free airtime.

Thank you for your consideration
